PROFILE

I am Chhavi Sharma, currently pursuing a Bachelor of Computer Applications (BCA) with an expected graduation in 2026. I am passionate about software development and continuously working on strengthening my technical and problem-solving skills.

I am seeking internships or entry-level roles where I can contribute effectively to projects, collaborate with professionals, and continue to grow as a developer.

PROJECTS

Weather App (Python, PyQt5, API Integration)

Created a GUI-based application that allows users to enter a city name and fetch real-time weather conditions (e.g., sunny, cloudy, thunderstorms) along with matching emojis and temperature in Fahrenheit.

- Developed a GUI-based weather application using Python (PyQt5) and REST API integration.
- Displayed weather conditions (sunny, cloudy, thunderstorms, etc.) with corresponding emoji icons for better visualisation.
- Strengthened skills in Python programming, PyQt5 GUI development, API integration, and event-driven design.

Email - Password Validator

Built a web-based validation tool that checks email formats and password strength in real-time using JavaScript and regular expressions.

- Developed an Email & Password Validator using JavaScript with regular expressions (Regex) for form validation.
- Focused on improving user experience by preventing incorrect submissions and guiding users toward secure password creation.
- Strengthened skills in JavaScript, Regex, form validation, and frontend development.

Portfolio Website

- Developed a dynamic, single-page resume application using HTML, CSS, and JavaScript to showcase portfolio and skills in an engaging format.
- Integrated GSAP (GreenSock Animation Platform) to create smooth animations, transitions, and visually appealing effects across different resume sections.
- Designed with a responsive layout to provide seamless accessibility across desktops, tablets, and mobile devices.
- Focused on creating a professional yet creative presentation that highlights technical skills while demonstrating front-end animation expertise.
